Vaporwave

I'd like to build this site as a long, single page website, instead of multiple pages. Site navigation will be on the site, fixed throughout the scroll. A lot of visuals to work with, focusing more on the aesthetics and imagery of this topic.

- **Home Page/Introduction** – Introduce basic point I want to get across about Vaporwave for people who don't know what its about
- **Origins and early scene**
- **Popularity and further developments**
- **Movement from music to aesthetics/visuals**
 - Album coverwork and Instagram influence
- **Critical interpretations**
 - Media influence
